

# Diabetes in the South Asian community

- Listen and Learn from the Experts

Saturday, Nov 1, 14

2 pm to 3:30pm

SV Temple Main Auditorium

7615 Metro Boulevard  
Edina, MN 55439

Studies clearly show that diabetes is one of the major health problems facing those of South Asian descent. According to the recent health survey conducted in Minnesota, 12% of the South Asians indicated that they have diabetes compared to 7% of the Minnesotans.

## ***Panel discussion with Experts:***

The panelists will share information on the risk of diabetes in the South Asian community, the preventative care, suggestions on how to be diabetic free, and ways to manage this chronic condition through diet and exercise.

We will promptly start at 2pm.

2:00 pm to 3:00pm - Panelist Presentation

3:00pm to 3:30pm - Q&A
